

MATERIAL TRANSFER

Material Transfer Receives Top Honor from Processing Magazine

ALLEGAN, MI – Material Transfer is honored to be awarded the 2020 Breakthrough Products Award by Processing Magazine for its new PowerFill® Bulk Bag Select Filling System. One of only ten recipients, the award honors innovative technology solutions that made significant contributions to the processing industry.

The new PowerFill® Select System – launched in August 2020 – offers customers the highest quality in dry powder and bulk solid material handling solutions, at significantly lower costs.

“We’re proud to receive this award which recognizes products that help end users better manage their processing environments, meet increasingly stringent safety requirements, reduce unplanned downtime and drive profitability,” said Scott Nyhof, president. “We’ve always held ourselves to a higher standard – and are pleased to offer top-of-the-line quality that meet our customers’ needs at affordable prices.”

In choosing the PowerFill® Select System, customers can expect advanced ergonomic features that provide effortless bulk bag connection, reduced operator fatigue and improved efficiency resulting in less downtime. Like all Material Transfer systems, the PowerFill Select® can be customized as needed to meet any specific application requirements.
